Air Trek Safety Policy Statement

Air Trek Safety Policy Statement

The Executive Management of Air Trek inc. (Air Trek) recognizes that an effective Safety Management System (SMS) is, and has been, vital to the success and longevity of the Company. Therefore the Executive Management is committed to upgrading our SMS program, which was first established in 2006, to meet and maintain the 14 CFR Part 5 SMS requirements for a fully functional SMS. Also the Company and its Executive Management Team is committed to the continuous improvement of the level of safety throughout Air Trek.

Executive Management of Air Trek has established specific safety-related objectives and published them on Chapter 1 Page 1 of the SMS manual. Air Trek will continue to periodically update, publish and distribute the 'Safety Objective' to all employees as those objectives and plans evolve.

These 'Safety Objectives' will continue to be monitored, measured, and tracked to ensure overall corporate safety objectives are met. All employees and individuals in the company continue to have the responsibility to perform their duties and activities in the safest practical manner.

Air Trek's Executive Management is committed to continue to provide the necessary financial, personal, and other resources to upgrade and maintain a fully functional SMS.

Air Trek's Executive Management is dedicated to maintaining the confidential employee reporting system, which was established at our SMS's inception, to report all hazards, accidents, incidents, and safety issues without fear of reprisal.

As has always been the case, activities involving intentional disregard for FAA regulations, company policies and procedures, illegal activities, and/or drug or alcohol abuse may be subject to disciplinary action.

As a component of the SMS, Air Trek's Executive Management is committed to upgrading, maintaining, and periodically exercising our Emergency Response Procedures and Plans (Page 11 to 16 of the SMS Manual) that provide for a safe and orderly transition from a normal to emergency operations and then a phased return to normal operations as the emergency situation is dealt with.

Air Trek's Executive Management will convey this expectations to all employees through postings, internet via the employee side of the company web sites, company newsletter, and any other means to ensure all employees are aware of the company's SMS, their duties and responsibilities, and our safety policy.

This Safety Policy will be periodically reviewed by Executive Management to ensure it remains relevant and appropriate to the company and its mission.
